Earth Machine Compost Bin

80 Gallon Bin

The Earth Machine® is a durable backyard compost bin designed to compost food and yard waste, effectively diverting it from landfills. When residents are encouraged to divert organics from the waste stream and are educated about the benefits of composting, up to 50% of organic waste can be diverted from the waste stream.

Norseman works closely with communities and municipalities to implement a successful composting program. From one-day, turn-key sales events to public education programs, Norseman experts help residents learn to divert food and yard waste from landfills. Through this diversion, communities are able to reduce curbside collections and decrease tipping fees.
