Millard Fillmore Gates Circle Hospital is moving!

As of Wednesday, March 28, all the services and staff that made Millard Fillmore Gates Circle Hospital great will move to the new Gates Vascular Institute and Buffalo General Medical Center, less than two miles away.

Millard Fillmore Gates Circle Hospital and Buffalo General Medical Center are coming together to provide all the best care, all in one place. But rest assured, we will continue to take care of the community at our new location, just as we have for more than a century. This move is all part of our mission to build a healthier future for Western New York.
