June 19, 2015

Erie County Department of Environmental Planning  
Division of Sewage Management  
Attn: Mr. Jim Carr  
95 Franklin Street  
Buffalo, New York 14202

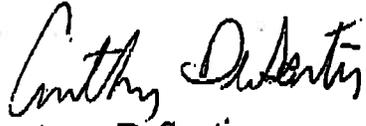

Dear Jim,

Based on our meeting with Steven Canestrari on Friday June 19, 2015, the sewer district agreed to provide the materials for any drainage issues in the Michelle Drive subdivision. The material is as follows:

640 lineal ft. of HDEP perforated piping (12 inches)  
4 catch basins with grates

The City will be responsible for the installation of all material. If you have any additional questions or concerns, you can contact me at your earliest convenience.

Respectfully,

  
Anthony DeSantis  
Commissioner of Public Works

**Subject:** City of Lackawanna request

Pat Breier and I met with Lackawanna City officials this morning. In the new Martin Road subdivision the City neglected to receive or require finish home elevations from the builders. Because of this, the City will be requesting of the D6 BOM some drainage pipe and a few catch basins to connect to the existing drainage system. This new installation will eliminate a drainage issue between the new homes and the existing homes on Martin Road.

Ken Strell from (Kheops) will be sending a formal request on behalf of the City. They are asking that this be included on the next BOM meeting agenda. They currently have issued a stop work order on a home being built, hence the urgency and the request to be included on the agenda on Tuesday.
