Pet Waste Affects Water Quality

Did you know pet waste is a health hazard and a stormwater pollutant? Stormwater runoff can wash bacteria from pet waste directly into local creeks and waterways.

Bacteria, parasites and viruses contained in pet waste are a health risk to other animals and people, especially children.

Pollution from Pet Waste is Easily Prevented

-  Always clean up after your pet
-  Use a scooper, bag or shovel to pick up pet waste
-  Double bag pet waste before disposing in trash
-  Do not dispose of pet waste in a storm drain, catch basin or sewer
-  Do not use pet waste as a fertilizer or add to a compost pile
