

Erie County Releases New Internet Mapping Application

"On-Map" On-line Mapping Application: Putting Erie County "On The Map!"

Erie County, New York

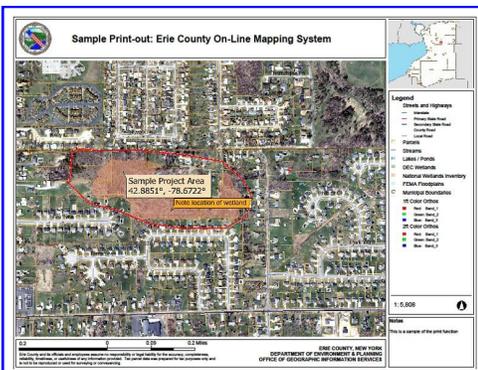

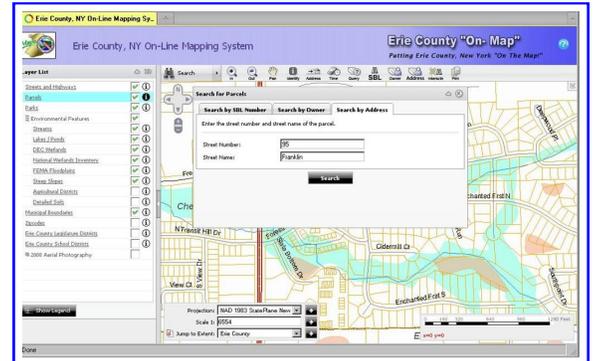

Chris Collins, Erie County Executive

The Erie County Department of Environment and Planning, under Commissioner Kathy Konst, is pleased to announce the availability of the new "Erie County On-Map" application. This Internet mapping application is based on state of the art mapping technology, and showcases many new features that were not available in the prior mapping program.

Users of the system are now able to mark up maps with symbols and text, save locations on the map as "bookmarks", save mapping sessions and return to a session at a later time, search for properties and link to the property tax records for selected parcels, and create drive-time rings.

There is a wide variety of information that can be mapped with the **On-Map** program, including property parcels; streets; environmental factors such as wetlands, floodplains, soils, and slopes; legislative and school districts; and aerial photography.

The **On-Map** program also includes capabilities for saving map images and high quality printing of maps as PDF documents.

For additional information on the **Erie County On-Map** program, please call Dale Morris, Director of the Erie County Office of Geographic Information Services at 858-7422.

To access **Erie County On-Map**, go to the Erie County homepage at www.erie.gov scroll down and click on the link to "Use Erie County's Online Mapping System".
