Dale Zuchlewski
Executive Director

Dear Friend:

Irene E. Pijuan
Director of HUD Programs

The Homeless Alliance of Western New York is proud to release this Executive Summary of our 2009-10 data analysis. This summary is based upon a full data analysis completed by Kristin Cipollone and can be found on our web site. I would like to thank the Homeless Alliance staff for their hard work in assisting in our efforts.

Rebecca Landseadel
HMIS Coordinator

John Morrissey
AmeriCorps/VISTA Staff

Kexin Ma
HMIS/CoC Assistant

While reading this report please keep in mind that while you are reading statistics and comparing numbers, these numbers represent PEOPLE. These are people in Erie County who have or are facing the very traumatic experience of being homeless, most of them for the very first time.

Suckie Smith
Operations Manager

Alecia Zimmerman
Community Analyst

The Homeless Alliance has taken great strides over the past few years to improve our data quality and those efforts will be ongoing.

Andrew Gaber
Community Analyst Assistant

We hope this report helps to generate a genuine community discussion on homelessness and its root cause; poverty. This report will serve as the basis for the update to our PRISM Plan (Prevention, Resources, Independence, Services & Maintenance), our 10-year plan to end homelessness.

We also hope this report helps to educate the general public and those in a decision-making position on homelessness and ignites the community will to end homelessness.

Thank you for taking the time to read this report and we hope you will be part of the continuing discussions on homelessness and poverty.

Sincerely,

Dale Zuchlewski
Executive Director

14M-9

- According to Homeless Alliance HMIS Data there were 8,030 homeless people. We estimate another 470 were not entered into the system because some agencies were not required to enter data into the system and the street homeless are difficult to enumerate. **We estimate the total number of homeless in Erie County to be 8,500.**
- On any given night there are between 1,200 and 1,500 men, women and children who are homeless.
- 18% of the homeless population in Erie County are children under the age of 18.
- Males make up 59% of the homeless population; females make up 39%.
- 45% of the homeless population is Black and 32% are white.
- 60% or 3,792 people were homeless for the first time last year. (some data is missing from clients).
- 729 people were identified as being chronically homeless (person with a disabling condition that was homeless for more than a year or experienced 4 episodes of homelessness in 3 years).
- 434 Veterans were identified as being homeless.
- 42% of the homeless population does not have a high school diploma with 4% having no schooling at all.
- Poverty is the root cause of homelessness. 29% of the people in Buffalo and 14% of the people in the County live below the poverty level.

- 43% (11,110) of female head of households in Buffalo live below the poverty level, 30% (15,344) in Erie County.
- 58% (36,476) of renters in Buffalo pay more than 30% of their income for rent.
- 6,426 people in Erie County have been assisted with Homeless Prevention and Rapid Re-Housing (**HPRP**) funds. **We will be facing an increase in homelessness once these funds are exhausted.**
- 59% of all HPRP funds went to single female head of households to prevent homelessness.

PRELIMINARY RECOMMENDATIONS :

1. We can end long term homelessness and manage situational homelessness. Study after study has shown it is more cost effective to house the chronically homeless than it is to leave them on the streets. **More safe havens and housing first options must be made available.**
2. Prevention is the key to ending homelessness. With the poverty levels we are facing in Erie County and Buffalo, especially among female head of households more must be done to provide **safe affordable housing.**
3. There appears to be a need for **Single Room Occupancy units** for men.
4. **Educational opportunities** must be increased for those living in poverty.
5. Jobs that pay a **living wage** must be more readily available.

Sheltered Homeless Snapshot Data

	PIT Count 2011	PIT Count 2010	Monthly Data 2010	Monthly Data 2009	Monthly Data 2008
Totals:	1299	1582	1184	1199	1202

In addition to the numbers reported in PIT and Monthly Data Counts, outreach workers estimate that there are between 100 and 200 unsheltered homeless, plus an additional 100 people residing in hotels/motels with DSS vouchers and/or squatters—a population that is difficult to track and quantify. This total number is certain to fluctuate over the year. For instance, service providers often report an uptick in family homelessness during the summer months, a phenomenon often attributed to landlords not wanting to turn families out during the school year.

Homeless Prevention and Rapid Re-Housing in Buffalo, Erie County, and Town of Tonawanda

Buffalo - BHOP

Erie County - ECHO

What can you do to help end homelessness in Buffalo and Erie County?

Community Checklist to End Homelessness

- ✓ Participate in our planning efforts to end homelessness.
- ✓ Every decision made by government should have an “impact statement” discussing how the decision alleviates poverty and homelessness.
- ✓ Help us gain the support of those in positions of power to assist in the efforts to end homelessness including the City, County, Buffalo Municipal Housing Authority, State of NY and the United States.
- ✓ Help us to educate the public on homelessness.
- ✓ When housing is being developed help us to educate the neighbors and to resist the Not In My BackYard mentality.
- ✓ More CDBG, HOME and general fund revenue must be dedicated to the effort to eliminate poverty and homelessness. Study after study has shown it is more cost effective to invest in housing for the long term homeless than it is to let them live on the streets.
- ✓ When redesigning Buffalo’s zoning codes do not make it more difficult to provide service and housing for the homeless.
- ✓ If your agency is assisting the homeless and NOT using HMIS for data collection, please contact us to get your agency involved.
