**Subject:** [Eriecountycleanupnews] PVS Chemicals, Inc. Site (City of Buffalo)  
**Attachments:** PVS Chemicals Public Notice.pdf; ATT00001.txt

EE

Attached is a public notice about the recent addition of the **PVS Chemicals, Inc. Site #915004 (City of Buffalo)** to the Registry of Inactive Hazardous Waste Disposal Sites within New York's State Superfund Program. This notice is being provided by the Division of Environmental Remediation within the New York State Department of Environmental Conservation (NYSDEC).

The notice is in PDF format. You can save, open, and read the notice by using Adobe Acrobat Reader. If you do not have Adobe Acrobat Reader, you can go to the following web page on the NYSDEC web site to download the program for free:  
<http://www.dec.ny.gov/about/590.html> .

Please do not respond to this email. Replies go to an untended mailbox. If you have questions about the site identified above, please use the contact information provided in the attached notice.

To protect your privacy, contaminated sites email notices are sent out as a bc (blind copy). That means no one can see your email address. If you wish to be removed from this contaminated sites email list, go to:  
<http://www.dec.ny.gov/chemical/61092.html> and click on the correct county link, where there is an option to unsubscribe.

**Site Name:** PVS Chemicals, Inc.

**November 4, 2011**

**Site No.:** 915004      **Tax Map No.:** 122.16-1-1.111

**Site Location:** 55 Lee Street, City of Buffalo, County of Erie 14210

**Inactive Hazardous Waste Disposal Site Classification Notice**

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (Department) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (the "Registry"). The site identified above, and located on a map on the reverse side of this page, was recently added to the Registry as a Class 2 site that presents a significant threat to public health and/or the environment for the following reason(s):

The site is used by an active chemical manufacturing facility. The site is part of the larger former Allied Chemical Corporation property that began operations in the early 1900s and contaminated onsite groundwater with various metals and organic compounds. In addition, sediment samples collected from the adjacent Buffalo River contain the same elevated contaminants as detected in groundwater. The site requires additional characterization to determine the nature and extent of contamination and the potential for human exposures to contaminated media.

The Department will keep you informed throughout the investigation and cleanup of the site.

**If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact the Department's Project Manager listed below.**

**FOR MORE INFORMATION**

Additional information about this site can be found using the Department's "Environmental Site Remediation Database Search" engine which is located on the internet at:

[www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3](http://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3)

Comments and questions are always welcome and should be directed as follows:
