INSTRUCTIONS

HOW TO USE HSSAT CHECKLIST TO IDENTIFY HOME HAZARDS TO PREVENT FALLS

Use the checklist to find and correct/fix the hazards for every room/area in your home that could cause you to trip/fall.

Steps to use the checklist

Step 1:
Go to each room/area of your home with this checklist; look for the hazards/items that are listed below the picture on each page. (Some items may not relate to your home).

Step 2:
If the problem is present in your room/area, check off in the appropriate box. After checking all the problems add them and write the total in the big box. (Each item that gets a checkmark is a potential hazard).

Step 3:
Then go through the solutions and take the necessary action to fix those problems which are a potential hazard.

Step 4:
Add the total number of hazards in all the rooms/areas to get a grand total.

Step 5:
Write down what action you are going to take to prevent falls in the Action Log for your records.
Entrance to Front Door and Front Yard

Are these problems present in your home?
If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

1. Lack of railings
2. Unsafe steps (too steep/cracked/chipped)
3. Unmarked or raised threshold
4. Lack of lighting at night
5. Lack of a ramp for a wheelchair
6. Uneven/cracked Pavement
7. Ice or snow on driveway/walkway

Other__________________________________________________________

Number of total problems _________
1. Lack of railings
   Add at least one railing, ideally one on each wall.

2. Unsafe steps (too steep, cracked, chipped, etc.)
   Have damaged or broken steps repaired.

3. Unmarked or raised threshold
   Mark end of steps or thresholds with contrasting tape or paint color to increase awareness of change in height.

4. Lack of lighting at night
   Add an outdoor light fixture if not present.
   Add a sensor light that automatically turns on and off.

5. Lack of a ramp for a wheelchair
   Have a remodeler or home contractor construct a ramp that will allow wheelchair access in and out of the home.

6. Unsafe pavement (uneven or cracked)
   Have uneven or cracked pavement repaired.
   Avoid these areas if possible when walking to and from the home.
   Contact local government for repair if it is a sidewalk or driveway end.

7. Ice or snow on driveway or walkway
   Use snow melter.
   Have snow/ice removed by a neighbor or service
Are these problems present in your home? If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

- [ ] 1. Uneven or slippery flooring
- [ ] 2. Cluttered area
- [ ] 3. Dark or poor lighting
- [ ] 4. Lack of access to ceiling light

Other: ____________________________

Number of total problem: _______
1. Unsafe flooring (slippery, uneven carpeting, etc.)

   Make sure floor surfaces are dry.
   Have carpet stretched or removed to eliminate wrinkles or bumps.
   Add a carpet runner to hallways or foyer.

2. Cluttered area

   Eliminate clutter on floors by removing and/or organizing items.
   Example: shoe tray, hooks for umbrella.

3. Dark or poor lighting

   Increase wattage to allowable limits in lights.
   Add additional overhead or wall lighting

4. Lack of access to ceiling light

   Ask another person to change the light.
   Add removable wall lights to poorly lit areas
Are these problems present in your home?
If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

☐ 1. Presence of throw or scatter rug  ☐ 5. Presence of unstable furniture
☐ 2. Presence of clutter  ☐ 6. Presence of unstable chair
☐ 3. Presence of electric cords across the floor  ☐ 7. Difficult to access light switches
☐ 4. Poor lighting  ☐ 8. Not enough space to move around

☐ Other

Number of total problem
SOLUTIONS FOR THE PROBLEMS
IN LIVING ROOM

1. Presence of throw or scatter rug

Remove scatter rug

2. Presence of clutter

Eliminate clutter on floor surfaces by placing items on shelves or storage. Consider donating or throwing out the items you no longer use.

3. Presence of electric cords across the floor

Run your cords behind furnishings. Use extension cords to accomplish this. Rearrange items that must be plugged in to areas near an outlet.

4. Poor lighting

Increase wattage to allowable limits in lamps/lights. Add additional lamp’s or wall/overhead lights

5. Presence of unstable furniture (chair, table, etc.)

Place a block under the shorter leg. If the chair or table is broken, have it repaired or replaced.

6. Presence of unsafe chair (too low, too high, without arms)

If the chair is too low, add a cushion or pillow to raise the height. A chair that is too high, or without arms should not be used as it will not provide you with sufficient stability to get in and out of the chair.

7. Difficult to access light switches easily

Add “clapper” light switch control to lamps. Rearrange furnishings to allow quick access to wall switch or lamps.

8. Not enough space to move around

Remove clutter or excess furniture that prevents you from moving around the room easily. Some items may be rearranged, while you may need to donate or throw out other items you don’t really need or use.
Are these problems present in your home? If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

1. Cabinet too high or low
2. Not enough counter space
3. Using a stool or a chair to reach things
4. Not enough room to maneuver
5. Presence of throw/ scatter rug
6. Presence of slippery floor
7. Poor lighting
8. Presence of a pet underfoot when preparing meals

Other ____________________________________________

SOLUTIONS FOR THE PROBLEMS
IN KITCHEN

1. Cabinet too high or too low

   Move items to the shelves closest to the counter.
   Add hooks to the wall for pots and pans you use frequently.

2. Not enough counter space

   Make sure available counter space is cleared of clutter.
   Move kitchen table closer to counter for additional work space.
   Use a rolling cart for added work space.

3. Using a stool to a chair to reach things

   Move items to lower shelves.
   Replace the stool with a sturdy step ladder.

4. Not enough room to maneuver

   Eliminate clutter or excessive furniture (extra kitchen chairs, etc.) to add space.
   Remove a leaf from the table and push it closer to the wall.

5. Presence of a throw/scatter rug

   Remove scatter rug

6. Presence of slippery floor

   Do not walk on a wet floor.
   Wear shoes or socks with a non-skid sole.
   Change flooring surface to one with a less slippery surface.

7. Poor lighting

   Increase wattage of bulbs to allowable level.
   Add under counter lighting.
   Add additional overhead lighting.

8. Presence of a pet underfoot when preparing meals

   Remove the pet from the room while working in the kitchen by adding a pet gate to the entry ways of the kitchen.
   Put the pet outside or in a crate.
Are these problems present in your home?
If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

☐ 1. Presence of clutter
☐ 2. Presence of electric cords across the floor
☐ 3. Unsafe carpet (uneven, torn, curled up)
☐ 4. Presence of throw/scatter rug
☐ 5. Height of bed
☐ Other

☐ 6. Lack of a telephone near the bed
☐ 7. Lack of nightlight
☐ 8. Arrangement that causes difficulty to reach items (TV remote, lamp)
☐ 9. Lack of device to get in/out of bed

Number of total problems
SOLUTIONS FOR THE PROBLEMS
IN BEDROOM

1. Presence of clutter

   Eliminate clutter on floor surfaces by placing items on shelves or storage. Consider donating or throwing out the items you no longer use.

2. Presence of electric cords across the floor

   Run your cords behind furnishings. Use extension cords to accomplish this. Rearrange items that must be plugged in to areas near an outlet.

3. Unsafe carpet (uneven, torn, curled up, etc.)

   Have carpet stretched or removed to eliminate wrinkles or bumps

4. Presence of throw/scatter rug

   Remove all scatter and throw rugs

5. Height of bed (too high or low)

   Too low: Add blocks below bed frame to raise height
   Too high: Remove bed frame or use a lower profile mattress or box spring

6. Lack of a telephone near the bed

   Place a cordless type or cell phone next to your bed at night or during naps

7. Lack of a nightlight

   Place at least 2 nightlights in the bedroom to illuminate the room at night. Add additional nightlights along the hall or path to the bathroom. Add one in the bathroom, also

8. Arrangement that causes difficulty to reach commonly used items such as a TV remote, medications, lamp, glasses, magnifier, etc. at night

   Place these items on your bedside table. If you don’t have a table, you may put a rolling cart or shelving unit next to the bed

9. Lack of a device to help get in and out the bed

   Purchase a ½ bedrail that can slide between mattress and box spring.
BATHROOM

Are these problems present in your home? If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

- Presence of bath rugs
- Lack of grab bars in the tub
- Lack of grab bars in the shower area
- Lack of grab bars near the toilet
- Toilet is too high or low
- Slippery tub (lack of bath mat, etc)
- Claw foot/tub that is high to get into
- Lack of bath chair in the shower area
- Clutter
- Incorrect placement of grab bars

Other ____________________________________________________________

Number of total problems
SOLUTIONS FOR THE PROBLEMS
IN BATHROOM

1. Presence of bath rugs.

   Remove bath rugs that do not have non-skid bottoms.

2. Lack of grab bars in the tub

   Add a clamp on bath grab bar to the side of the tub.

3. Lack of grab bars in the shower area

   Add grab bars to the wall across from the tub and on the wall where there are bath faucets.

4. Lack of grab bars in the toilet

   Add a grab bar next to the toilet wall or toilet safety grab bars that attach at the toilet seat screws.

5. Toilet is too high or too low

   Add a raised toilet seat for seats that are too low.
   Consider a lower profile toilet if it is too high.

6. Slippery tub (lack of bath mat, etc.)

   Add a rubber bath mat or adhesive non-skid decals to the bottom of the tub.

7. Claw foot or other type of tub that is too high to get into easily

   Add a tub transfer bench to slide into the tub area, or replace with a lower tub.

8. Lack of bath chair in the tub or shower area, or tub transfer bench

   Add a tub bath or chair along with grab bars. A tub transfer bench is helpful if you have difficulty stepping into the tub area because you can sit and slide over into the tub area.

9. Clutter

   Remove clutter from all floor areas to drawers or closets. Inexpensive plastic cabinets or rolling units can be purchased to store bath items.

10. Incorrect placement of grab bars

    If permanently installed, hire a qualified professional to change the grab bars to the correct location and angle.
Are these problems present in your home? If yes, please check in the box next to the problem, then add the total number of checks and enter it in the box below.

☐ 1. Poor or lack of lighting
☐ 2. Lack of railings
☐ 3. Steps too steep
☐ 4. Slippery steps without tread/ carpet
☐ 3. Cluttered
☐ Other____________________

Number of total problems ___
SOLUTIONS FOR THE PROBLEMS
IN STAIRCASES

1. Poor or lack of lighting
   Increase wattage to allowable limits in lights
   Add additional overhead or wall lighting

2. Lack of railings
   Add at least one railing entire length of the wall, ideally one on each side.

3. Cluttered
   Eliminate clutter on floors by removing and/or organizing items in areas near the stairs.

4. Steps too steep
   Use railings for stability.
   Walk slowly up and down stairs with lights on.
   Have others carry heavy or large items up or down the stairs.
   Reduce daily use of stairs to reduce risk of falls

5. Slippery steps without tread or carpet
   Add adhesive stair treads, or carpet runner.
Total Number of Home Hazards

Transfer all the total scores of each room/area in the appropriate boxes and add all the scores to get a grand total.

Entrance to Front Door and Front Yard

Hallway or Foyer

Living Room

Kitchen

Bedroom

Bathroom

Staircases

Grand Total

If you have 1-5 problems, you have less than 10% of possible home hazards. 6-10 problems, you have less than 20% of possible home hazards. 11-20 problems, you have less than 40% of possible home hazards. 26 or more problems, you have more than 50% of possible home hazards.

You should reduce the percentage of the home hazards as much as possible. Refer to solutions in each area.
