

Over 3 million Americans  
are in accidents each year

Reactions after a crash:

- Feeling scared to drive
- Frequent memories
- Trouble concentrating
- Being jumpy and irritable
- Thoughts of the accident
- Anxiety

These reactions are normal

But sometimes these  
feelings get in the way

We would like to help you  
move past your accident

Have you been in a  
car accident?

The Motor Vehicle  
Accident Research  
Clinic

The U.B. Motor Vehicle  
Accident Research Clinic  
at  
The University at Buffalo

Offers FREE evaluations  
and treatment services

For adults who are  
recovering from a car crash

## Benefits

Evaluations are FREE and  
Confidential

If you request, the results  
of your evaluation can be  
given to your doctor.

## What Will I Need To Do?

The evaluation takes 2-3  
visits to the North campus  
of the University at Buffalo.

You will be asked to talk  
about your accident and your  
current feelings

## Treatment

You may qualify for  
treatment at our clinic.

If our treatment is not  
the best choice for you,  
we will provide you with  
referrals for treatment.

## Who Do I Call?
