

# Have You Recovered After Testing Positive for COVID-19? We Need Your Help.

The University at Buffalo and its affiliated hospitals are seeking recovered COVID-19 patients to donate plasma in an emergency clinical trial. Your antibodies will be used to help treat severely ill patients battling the disease in Western New York and may help lessen their symptoms.

The project is part of the National COVID-19 Convalescent Plasma Project, which the Food and Drug Administration has approved as an Emergency Investigational New Drug (EIND).

#### **You May Qualify If You:**

- Are ages 18+
- Have tested positive for COVID-19 or were exhibiting symptoms of COVID-19 without an initial test
- Are now at least 28 days without symptoms

**Please complete the online screening form now at:**

[buffalo.edu/ctsi/covidplasma](https://buffalo.edu/ctsi/covidplasma)

#### **Please Note:**

- Certain criteria are required for you to donate your plasma.
- We will call you to review your screening form and ask more questions about the course of your illness.
- If you are eligible, we will refer you to the local collection site to schedule a donation appointment.
- Donation will involve one or more blood draws.
