# COVID-19 Antigen Tests

- Follow test instructions exactly.
- These tests **may** identify a current COVID-19 infection.
- An at-home COVID-19 antigen test is not as sensitive* as a lab-based rapid COVID-19 antigen test.
- Report positive results using the online form at **www.erie.gov/iq**.
- If you have COVID-19 symptoms, stay home from work or school, limit your contact with other people, and wear a mask.
- For Erie County Department of Health COVID-19 testing, call (716) 858-2929.
- Contact your doctor or health care provider with medical questions.

*The most sensitive COVID-19 test is a PCR or rapid molecular diagnostic test (i.e., ID Now).
