Subject: [Eriecountycleanupnews] 129 Holden Street Redevelopment Site (City of Buffalo)
Attachments: HoldenSt Investigation Work Plan.pdf; ATT00001.txt

EE

Attached is a fact sheet that invites the public to comment on a draft work plan to investigate the **129 Holden Street Redevelopment Site #C915261 (City of Buffalo)**, under New York's Brownfield Cleanup Program. This fact sheet is being provided by the Division of Environmental Remediation within the New York State Department of Environmental Conservation (NYSDEC).

NYSDEC is accepting **public comments** about the proposal through **May 30 20, 2012**. Please see fact sheet for details.

The fact sheet is in PDF format. You can save, open, and read the fact sheet by using Adobe Acrobat Reader. If you do not have Adobe Acrobat Reader, you can go to the following web page on the NYSDEC web site to download the program for free:
<http://www.dec.ny.gov/about/590.html> .

Please do not respond to this email. Replies go to an untended mailbox. If you have questions about the contaminated site identified above, please use the contact information provided in the attached fact sheet.

To protect your privacy, contaminated sites email notices are sent out as a bc (blind copy). That means no one can see your email address. If you wish to be removed from this contaminated sites email list, go to:
<http://www.dec.ny.gov/chemical/61092.html> and click on the correct county link, where there is an option to unsubscribe.

Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate 129 Holden Street Redevelopment ("site") located at 129 Holden Street, Buffalo, Erie County. Please see the map for the site location. Documents related to the cleanup of this site can be found at the location(s) identified below under "Where to Find Information."

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses.

A **brownfield** is any real property that is difficult to reuse or redevelop because of the presence or potential presence of contamination.

For more information about the BCP, visit:
<http://www.dec.ny.gov/chemical/8450.html>

Draft Investigation Work Plan

The draft investigation work plan, called a "Remedial Investigation Work Plan," was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed with oversight by NYSDEC and the New York State Department of Health (NYSDOH). The investigation will assess conditions on-site.

How to Comment

NYSDEC is accepting written comments about the draft investigation work plan for 30 days, from May 1, 2012 through May 30, 2012. The proposed plan is available for review at the location(s) identified below under "Where to Find Information." Please submit comments to the project manager listed under Project Related Questions in the "Who to Contact" area below.

Highlights of the Proposed Site Investigation

The site investigation has several goals:

- 1) define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected;
- 2) identify the source(s) of the contamination;
- 3) assess the impact of the contamination on public health and the environment; and
- 4) provide information to support the development of a proposed remedy to address the contamination.

Next Steps

NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. The approved work plan will be made available to the public (see "Where to Find Information" below). After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to the NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a cleanup plan, called a "Remedial Work Plan" will be developed and a Decision Document will be proposed. The cleanup plan will include an evaluation of the proposed site remedy, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period. NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Background

Site Location: This site is the Central Park Plaza and is located at 129 Holden Street in the City of Buffalo.

Site Features: The site is approximately 27 acres in size and consists of one parcel with five vacant buildings and a parking lot.

Current Zoning/Use(s): The site is located within the commercial zoning district.

Historical Use(s):

From 1877 to 1948, the Buffalo Cement Co. operated this site for mining. In 1958 the site was developed by Central Park Shopping Center, Inc. In addition to shopping stores, other businesses such as auto repair, photographic processing, and dry cleaning also occupied the Central Park Plaza. The site has been vacant since July 2011.

Site Investigations:

GZA GeoEnvironmental of New York performed Phase I Environmental Site Assessment (ESA) in August 2011 and Phase II ESA in October 2011. The Phase II ESA showed the presence of relatively low levels of contaminants in soil: xylenes, PCBs, PAHs, and metals (cadmium; chromium; lead). Only metals and PAHs exceeded the Part 375 Soil Cleanup Objectives for residential use.

Site Geology and Hydrogeology:

Overburden soils are generally fill materials underlain by lacustrine silt and clay. The depth of overburden is approximately 10 to 16 feet below ground surface. The bedrock consists of Bertie Limestone. Depth of the bedrock varies due to historic quarry operations. The groundwater flow direction is unknown.

The Brownfield Cleanup Program Acceptance Letter was signed by NYSDEC on 1/31/12.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's website at:

<http://www.dec.ny.gov/cfm/external/derexternal/haz/details.cfm?pageid=3&progno=C915261>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.

Receive Site Fact Sheets by Email

Have site information such as this fact sheet sent right to your email inbox. NYSDEC invites you to sign up with one or more contaminated sites county email listservs available at the following web page:
<http://www.dec.ny.gov/chemical/61092.html>. It's quick, it's free, and it will help keep you *better informed*.

As a listserv member, you will periodically receive site-related information/announcements for all contaminated sites in the county(ies) you select.

You may continue also to receive paper copies of site information for a time after you sign up with a county listserv, until the transition to electronic distribution is complete.

Note: Please disregard if you already have signed up and received this fact sheet electronically.
