

Virtual Learning Support Centers Now Open

Did your school district adopt a hybrid learning model?

Do your children need help on the days when they are supposed to learn from home?

Virtual Learning Support Centers (VLSCs) have opened in conjunction with several area school districts. These support centers are for school-aged children who's district has opted to run a hybrid model. VLSCs will provide a safe and healthy supervised environment for children while allowing them to engage in the virtual learning their district requires.
